Subject Index

Adulthood, transition to, 275–288
Assessment. *See* specific tests
Assessments for autism, 418–438
Autism spectrum disorder. *See* Autism
Autism, and associated symptoms, 439–449; and early intervention, 418–438; and hyperresponsive sensitivity, 233–245; and transition and change, 401–417, 439–449; and vocabulary, 177–193; negative impacts of mothers, 450–461
Awareness, phonological, 155–166

Basic Learning Abilities Test, 130–139
Behavior, aberrant, 122–129; antisocial, 207–220; problem, 31–39. 330–348; and social skills, 375–391; effect on maternal well-being, 401–417
Behavioral Function Scale, 122–129
Body-rocking, 66–75
Borderline intellectual functioning, 107–121

Census, 462–466
Child and Adolescent Impact Assessment, 450–461
Culture, 330–348

Developmental Behavior Checklist, short form, 31–39
Directiveness, of teachers, 94–107
Divorce, 261–274
Down syndrome, and divorce, 261–274; and vocabulary

Early intervention, in autism, 418–438
Emotions, 194–206, 375–391
Environment, responding to, 167–176
Ethnicity, and positive impact, 330–348; and perceived negative impact of autism, 450–461
Eye contact, 330–348

Family, climate, influence on loneliness, 18–30; structure of, 261–274; positive impacts on, 330–348. *See also* Mothers; Parents
Fragile X syndrome, and eye-gaze avoidance, 349–360; and expressive language, 1–17; and narrative abilities. 289–299, and language, 177–193
Friendships, 18–30, 319–329

Gaze avoidance, 330–348

Happiness, indicators of, 167–176
Health, inequalities in, 140–150; pneumonia, 467–471
Hyperresonsiveness, 233–245

Intellectual functioning, impact on autism, 439–449
Intervention, early, 375–391

Language, expressive, 1–17; limitations in, 40–53; measurement of, 289–299; 177–193
Loneliness, 18–30

Mapping in language development, 40–53
Memory, visual short term, 79–93
Mental retardation, and basic visual and cognitive abilities, 54–65
Mental rotation tasks, 311–318
Microswitches, 167–176
Mothers, early regulation and scaffolding, 375–391; well-being, 401–417; and perceived negative impact, 450–461
Motivation, assessment of, 122–129

Parents, of children with borderline intellectual functioning, 107–121; and divorce, 261–274; rewards and worries, 261–274; well-being of, 418–438. *See also* Mothers
Pneumonia, aspiration, 467–471
Posture, control of, 66–75
Prediction, of performance, 130–139
Prevalence, 462–466
Problems, in externalizing behavior, 18–30
Psychotropic medications, and autism, 401–417

Reading, 155–166
Relationships, mother–child, 401–417
Risk factors, for sexual abuse, 221–229

Salience, feature, 311–318
Search, visual, 54–65
Sexual, abusers, 221–229
Social factors, and gaze avoidance, 330–348; skills, 375–391
Socioeconomics, and health care, 140–150
Stereotypy, dynamics of, 66–75

Tasks, multimodal demands, 330–348
Teacher–child interactions, 94–107
Therapy, prokinetic, 467–471
Transition Daily Rewards and Worries Questionnaire, 261–274
Treatment Intervention and Progress Scale for Sexual Abusers With Intellectual Disabilities, 221–229
Tube feeding, 467–471

Validation, of the Developmental Behavior Checklist, 31–39
Velocardiofacial syndrome, 79–93
Vocabulary, and fragile X syndrome, 1–17, 177–193; effect on language development, 40–53

Williams syndrome, and emotional responsivity, 194–206
Word attack, 155–166
